# FACT SHEET

## SOLAR HOT WATER SYSTEMS

### *What brands do we retail?*

Solar Mio ~ Flat Plate Collectors, Australian made in Albury NSW using stainless steel Everlast storage tanks also made in Australia.

Apricus – Evacuated Tube Collectors with stainless steel or glass lined storage tanks.

### *Does the tank go on the roof?*

No. Solar Mio are a slim-line panel recirculation or thermo-siphon system with the booster or storage tank located either on ground level or in a ceiling cavity. Apricus are also a recirculation based system with the tank located at ground level in or out of the dwelling.

### *What configuration options are there?*

Both systems come in kit form as either an electric or gas boosted recirculation system. In addition, Solar Mio panels can be retrofitted to an existing electric HWS as long as it is relatively new. Solar Mio systems can also be installed as low pressure gravity systems using hot water from a slow combustion stove as the booster.

### *Why Solar Mio is the most advanced Flat Plate system you can buy?*

Super efficient black nickel absorption surface developed by CSIRO. Over 20 years of development & research. Anti glare prismatic glazing that is cushion mounted to avoid breakage. Frost protection as standard. Copper piping. Stainless steel storage tank that can remain on off-peak power for boosting. 7-10 year pro rata warranty on panels, 10 year warranty on Everlast tank.

### *What rebates might I be eligible for?*

Both systems are eligible for NSW rebates, RECS rebates and Commonwealth rebates. Excepting retrofit, mobile and Thermo-siphon options.

### *What are the criteria for rebate eligibility?*

NSW Climate Fund & Office of the Renewable Energy Regulator (RECs) Criteria

- Must be a complete model listed in the register of Solar Water Heaters
- Must have been installed in the last 12 months.
- Must replace an existing electric storage hot water system.(NSW Climate Fund only)

Commonwealth Criteria

- Must replace an existing electric storage hot water system.
- System must be a solar or heat pump eligible for at least 20 RECs
- System must have at least a 5 year warranty
- Must be installed at your principal place of residence
- For rental properties either the tenant or the owner may apply.
- Dwelling cannot be a new construction
- Dwelling cannot be a holiday home
- Applicant cannot be a business
- System cannot replace an existing gas hot water system
- The system cannot replace or be in addition to an existing solar or heat pump
- The system cannot be used for heating a pool or spa or similar

### *How much are the rebates likely to be?*

(RECs) ~ between \$792 and \$1,548 depending on value of RECs & system

NSW Climate Fund ~ \$300

Commonwealth ~ \$1000 (Heat Pumps \$600)

Accurate as of 27-8-10
